To: [REDACTED]

Dear Dr. [REDACTED]

We have never met, but I would like to apply for your open postdoctoral position studying sleep with zebrafish. As the posting requests, attached you will find a cover letter and CV with references.

I noticed you have several lab members presenting at SfN next week. I will be sure to stop by. I will be presenting as well (abstract #5883, presentation #581.01, Tuesday 1-5pm). My dynamic poster will describe our work using *C. elegans* to study several internal and external factors that regulate sleep, and our continuing efforts to capture neural and behavioral state transitions with whole-brain imaging.

If you are attending SfN and you are available, it would be fantastic to meet face to face! I would be happy to setup a time to chat.

I look forward to hearing from you,

-Daniel
